

IMPROVING VISIBILITY OF YOUR EXTENDED WORKFORCE WITH A VMS

We're big believers in the power of automation and visibility when it comes to integrating the extended workforce into your VMS. Below are three ways a VMS improves contingent labor insights.

1

Single Source of Record

Manage all your workers' reviews, work history, and rates for an easy end-to-end understanding of spend.

2

Visibility of Contractors and SOW

Manage placements, pay, and other administrative tasks of your contractors and SOW workers to save you time and money.

3

ID Management

Understand who is on-site when they've met your compliance requirements with ID management built into your VMS.

Learn more about these topics and more in our ebook, ['4 Benefits of Incorporating the Extended Workforce in Your Vendor Management System.'](#)
